

Coding for Fun - Not Profit

Berlindroid - August '26 

Hype Driven Development

"How I learned to stop worrying and love the failures"

Solutions Looking for a Problem

- Augmented / Virtual Reality
- Blockchain
- LLM / NLP
- Wear OS Companion Apps

CEO Driven Development 💡

Familiarity / Risk Aversion

- Dependency discomfort
- Lack of maturity
- Learning curve

Decision Fatigue 🤔

Law of the Instrument

“I suppose it is tempting, if the only tool you have is a hammer, to treat everything as if it were a nail.”

— *Abraham Maslow*

Developmental Development

- Novel solutions require creativity
- Training through experimentation

Knowledge Sharing

Jake Wharton

@jw@jakewharton.com

As of today, the Lysine projects (OkHttp, Okio, Retrofit, and the SQL Delight family) have a contribution policy that forbids LLM usage for creating code and for PR/issue descriptions and comments.

There is an exception for translation assistance provided you disclose its use.

If you choose to use LLMs locally for research, analysis, and/or experimentation we can't stop you. But for contributing we require you to write the code, and for our interactions to be with you.
